The **11<sup>th</sup> International Conference on Pattern Recognition Systems (ICPRS-21)** is an annual event that follows ICPRS-19, ICPRS-18, ICPRS-17 and ICPRS-16, a continuation of the successful Chilean Conference on Pattern Recognition that reached its 6<sup>th</sup> edition in 2014. In 2021 it is organised by the Universidad de Talca (Chile) and the **Chilean Association for Pattern Recognition (ACHiRP)**, a member of the IAPR, **endorsed by the IAPR** and sponsored by the Vision and Imaging Professional Network of the **Institution of Engineering and Technology (IET)**. As in previous years, papers deemed to be of the required standard AND presented at the conference, will be normally indexed in **IEEE Xplore** and **Scopus**. **Please note that the publishers might reject papers which are too similar to previous publications, even if the work is presented at the conference.** All paper submissions need to be submitted via Conftool to be peer-reviewed (double-blind) by an international panel of experts. Excellent papers will be encouraged to submit extended versions for consideration in a JCR-indexed journal (tba). For more information, please see <http://www.icprs.org>. There will be a good set of keynote talks. An innovative aspect of this conference is that it will be **mainly virtual** so that authors, invited speakers and delegates will be able to attend through a webinar system. There is also a special "Student Paper" category for papers whose main author is a registered student at the time of submission.
